Holy Cross Catholic Primary School, Harlow

JUNIPER BENCHMARK ANALYSIS

Summer 2023-2024

Juniper

YOUR PROGRESS PARTNER

Dear colleague,

A warm welcome back to school for the new academic year. We hope that both pupils and staff managed to use the Summer break to recharge the batteries for the new year.

As we navigate the evolving education landscape, we know that benchmarking reports will hold unprecedented importance this year. We trust this latest report will offer the insights, trends, and opportunities necessary to improve your pupils' learning journeys.

We've got some exciting things planned for 2024 and can't wait to share these with you. Be sure to visit our website regularly for updates and the latest exciting news from Juniper Education. We pride ourselves on our communication with our customers and want to share any developments within the company with you first, so you don't miss out.

As we begin the new academic year, I want to extend my heartfelt thanks to all our customers. Your trust and support have been instrumental in our journey, and as we embark on this new year together, our commitment remains resolute to provide you with exceptional service and support. Here's to a year filled with collaboration, growth, and shared success. Wishing you all the best for the year ahead!

Thank you again for your support, and we look forward to our ongoing partnership together.

Best wishes,

Gavin Freed

Executive Chairman, Juniper Education

ABOUT YOUR REPORT PACK

Your report pack gives you a comparison to a statistically significant national data set, by comparing your school's teacher assessments against other schools who use one of Juniper Education's tracking solutions.

The analysis looks at the attainment data for Reading, Writing and Mathematics and compares it to the Juniper Education national benchmark. Your pack will provide you with headline data for whole school, individual year groups and contextual groups.

What data has been used, and what is being compared
- We've used c.6,500 schools' teacher assessments that took place in the Summer term 2023-2024.
- We have only included pupils who were on-roll as of 19-07-2023.
- We compared each pupil's summative teacher assessment against the age-related expectation (ARE).
- Using this we created a 'flag' to determine if the pupil was below, at or above ARE.
- We then aggregated these 'flags' to create a total figure of pupils that were at and above ARE.
- Finally, we used the total number of pupils with a teacher assessment to create a percentage figure of pupils who are at and above ARE.
- The data used to create this 'flag' was a snapshot of your tracker on 19-07-2023.

How we calculate your percentages
We understand the importance of transparency and therefore we have included the formula that we've used below:

(Number of pupils in each year group at your school, assessed as 'at' or 'above' ARE / Number of pupils in each year group in your school) x 100

This is then compared to:

(Number of pupils in each year group in all Juniper Tracker schools, assessed as 'at' or 'above' ARE / Number of pupils in each year group in the entire Juniper dataset) x 100

An example would be: Example Primary School has 100 pupils in Year 6, 50 pupils were assessed as 'at' or 'above' ARE, so the calculation would be (50/100) x 100 = 50%.

Local Authority averages
We have included average data for **ESSEX** to give you an additional comparison with schools local to you. As the number of schools using Juniper Tracker software varies by region this should be taken into consideration when drawing any conclusions.

There are 228 ESSEX schools with Juniper Tracker data for this assessment point.

ABOUT YOUR REPORT PACK

How you can use your benchmark report:

- Take a look at your data compared to the Juniper average. It may not directly correlate to published standards and statutory assessment data, but it will give you insight that no other report can:
    - It is live data based on a nationally significant snapshot of the exact time it was taken of over 6,500 schools and over 1.5 million pupils. No other data set in the country can provide that 'live' view of data.
    - Whilst the ultimate individual result against reported data may be a snapshot. You should consider the following indicators to feed into your attainment reporting and development plans:
        - how your school tracks and compares in each subject, particularly when compared against one another,
        - how each vulnerable group compares and its relative gap to national data.

- Consider your action plans from this, think about reviewing areas of discrepancy and how they might be tackled, what intervention might be required.

Please note:
- If any data has been updated in your tracker since the date this pack was created, the analysis in this document may not precisely match the analysis in your tracking system.
- No pupil level data has been copied from your tracker to create this report. We calculated the number and percentages in your tracker and only used this summary level data to produce the report.
- This pack has been designed to aid all schools using one of Juniper Education's tracking solutions, therefore we will not be able re-run this analysis for individual schools.

Our Support Plus Packages

With unlimited access to all our training webinars and a range of additional benefits, the Support Plus packages are designed to help you and your team get the most impact out of Sonar Tracker. We're offering two levels of support:

| Support Plus Gold	Support Plus Platinum
£375 + VAT	**£525 + VAT**
* System health check	* Customise your assessment statements
* Unlimited training webinars	* System health check
* A dedicated member of our support team	* Unlimited training webinars
	* A dedicated member of our support team

To add either of these packages to your subscription simply complete this <u>short form</u>

NATIONAL BENCHMARK SNAPSHOT

This report displays the percentage of pupils expected or higher for Age-Related Expectations.

Our comprehensive maths offering will help you develop your staff's subject knowledge and range of teaching techniques.

Juniper

Webinars, Training, Consultancy and CPD

Did you know we offer a comprehensive programme of webinars, training, consultancy and CPD?

From getting started with assessment and reporting, to analysing your statutory assessment, there's a whole range of quality courses available from our expert team.
Our CPD offering also covers a variety of topics including:

- Being new to subject leadership
- Subject leader updates (English, Maths, Science)
- Deep dive preparation
- Safeguarding
- Safer recruitment

Please take a look and if there's something you need help with that isn't currently covered, or you'd prefer a session just for your school, we can arrange bespoke consultancy for you.

Alternatively, please drop us an email anytime (training@junipereducation.org) and we can discuss your particular training requirements in more detail.
We're always happy to help!
